Algebraic geometry is a branch of mathematics, classically studying zeros of multivariate polynomials.Modern algebraic geometry is based on the use of abstract algebraic techniques, mainly from commutative algebra, for solving geometrical problems about these sets of zeros.. The fundamental objects of study in algebraic geometry are algebraic varieties, which are geometric manifestations of ...

Calculus, known in its early history as infinitesimal calculus, is a mathematical discipline focused on limits, continuity, derivatives, integrals, and infinite series. Isaac Newton and Gottfried Wilhelm Leibniz independently developed the theory of infinitesimal calculus in the later 17th century. By the end of the 17th century, both Leibniz and Newton claimed that the other had stolen his ...

Of course, the polynomial functions form a much less rich class than the others, but by restricting our study to polynomials we are able to do calculus over any

Develop strong analytic and quantitative skills needed to identify problems, develop a program to address the problem, execute a rigorous analysis of the issue, and reach independent conclusions. Develop a rigorous scientific base across multiple disciplines (social, biological, and physical sciences) but with a strong concentration in one area so as to develop depth of expertise in that field.

En ellipse er i matematikk | Kjeglesnitt

En ellipse er i matematikk en type kjeglesnitt. en plan kurve dannet som skjæringslinjen mellom et plan og en kjeleflate. Andre typer kjeglesnitt er parabler og hyperbler. En ellipse kan defineres geometrisk som en samling av punkter der avstanden til et gitt punkt og avstanden til en gitt rett linje har et konstant proporsjonalitetsforhold, og der proporsjonalitetskonstanten er mindre enn 1.
