Chemical Warfare Agents; Chemistry, Pharmacology, Toxicology, and ...

Obviously, they'd much rather be learning chemistry, so I've been reading up on the different chemical agents used during World War 1, and this graphic is a byproduct of that. As it turns out, several of them were used for the first time at Ypres, so it'll even be topical! A range of different chemicals were used as weapons throughout the conflict. The French were actually the first to ...

Chemical Warfare: Poison Gases in World War 1 - Compound Interest

An element is a chemical substance made up of a particular kind of atom and hence cannot be broken down or transformed by a chemical reaction into a different element, though it can be transmuted into another element through a nuclear reaction.This is because all of the atoms in a sample of an element have the same number of protons, though they may be different isotopes, with differing ...

Chemical substance - Wikipedia

Phosgene is the organic chemical compound with the formula COCl 2.It is a toxic, colorless gas; in low concentrations, its musty odor resembles that of freshly cut hay or grass. Phosgene is a valued and important industrial building block, especially for the production of precursors of polyurethanes and polycarbonate plastics.. Phosgene is extremely poisonous and was used as a chemical weapon ...

Phosgene - Wikipedia

Although narrower in scope, ecotoxicology played an important role in the development of environmental toxicology. In the 1970s scientists concerned with toxins in the environment increasingly focused their research on the impacts of agents of biological warfare (e.g., Agent Orange), on industrial pollution, and on

environmental toxicology | Britannica

The use of ChE inhibitors as insecticides and chemical warfare agents, their toxicity to humans, and their impact on wildlife have made them important to toxicology researchers, and public health and environmental health officials. This article focuses on ChE inhibitions by OPs and CBs. Other chemicals, such as tacrine, cocaine, and ...
