The Material Design color system helps you apply color to your UI in a meaningful way. In this system, you select a primary and a secondary color to represent your brand. Dark and light variants of each color can then be applied to your UI in different ways. Colors and theming.

Color System - Material Design

The color wheel was invented in 1666 by Isaac Newton, who mapped the color spectrum onto a circle. The color wheel is the basis of color theory, because it shows the relationship between colors. Colors that look good together are called a color harmony. Artists and designers use these to create a particular look or feel.
