Complete the following steps on both the local and remote hosts. a) Identify the SRDF source and target volumes available to your assigned hosts. Execute the following commands on both the local and remote hosts. # symrdf list pd (execute on both local and remote hosts) or. # syminq.

Infra World: Step by Step SRDF Implementation

The host (or hosts, in a cluster) can read and write to both devices. SRDF/Metro ensures that each copy remains current and consistent and addresses any write conflicts that might occur between the paired SRDF devices. The following figure shows two SRDF/Metro configurations. The top half shows an SRDF/Metro configuration with a standalone host.

Administering EMC Symmetrix Remote Data Facility ...

SRDF/A, is asynchronous mode of replication which maintains a near-real-time copy of the data and involves some data loss unlike SRDF (Sync) which maintains a real time copy. The replication happens within a scheduled time gap of may be few minutes to hours as per customer

requirements. It involves RPO/RTO.

Going with the SRDF Family Product Guide, there are certain restrictions, but I don't think the above scheme is not allowed explicitly. So, I'm hoping to keep 3 copies around, while the DMX3 R1 controls the source and 2 copies, and the VMAX R21 controls a third copy . Good idea, for sure, but will it work??? Thanks, Guus.
